# INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP03/10091

## With Respect to Scope of Claim 2 for Search

The term "a basic-nitrogen-containing polymer containing basic nitrogen and having no pressure-sensitive self-adhesive properties" used in claim 2 is unclear as to what polymer is specifically included besides the acrylic polymers shown in the description as examples, such as methyl methacrylate/butyl methacrylate/dimethylaminoethyl methacrylate copolymers, and as to what polymer is not included, even when the statements in the description are investigated. This term hence makes the scope of the invention unclear.

Consequently, claim 2 and the description do not comply with the given requirements to such a degree that a meaningful international search can be made.

In this international search report, a search was hence made through prior art documents with respect to the polymers specified in the description.
